Experience

Frontend Developer
PT Supala Kreatif Studio

Remote - Full time
June 2023 - Des 2023

I have experience developing Android applications, working on both the frontend using TypeScript and React Native, and the web using Vue.js. Additionally, I have worked on the backend using Eloquent Laravel. For managing complex state, I utilize Redux in React and Pinia in Vue.js. My routine involvement in both frontend and backend development has equipped me with the knowledge to handle the development process efficiently and effectively

Frontend Developer
PT Millenia Solusi Informatika

Bandung, Indonesia - Fulltime
March 2023 - May 2023

I have worked on web app projects catering to a large user base. Typically, we begin with a kickoff meeting, and I receive a preliminary wireframe from the Tech Leader. Subsequently, I obtain the final mockup from the business analyst. Once the mockup is finalized, I translate it into HTML and JavaScript code, utilizing Vue.js as a framework. For managing complex state, I use the Vuex state management system."

Freelance Web Developer

Remote
2022 - Now

I began my career as a web developer working as a freelancer, either directly with clients or through freelance websites like Upwork.com. I have been freelancing since late 2022, and I continue to enjoy working remotely.

Education

Jenderal Achmad Yani University
Bachelor of Mechanical, GPA 3.01

Bandung, Indonesia - Graduated 2019

Tools & Skills

Html	Typescript	Vue.js	Express
